Sir:

Prior to examination, please amend the above-identified application as follows:

IN THE CLAIMS:

7. (Amended) An image data retouching apparatus, as claimed in Claim 4, wherein said picture element characteristic determining unit determines picture elements to be moiré picture elements if the distribution in said range of smaller differences is dominant and if said distribution is polarized positively or negatively.

10. (Amended) An image data retouching apparatus, as claimed in Claim 9, wherein said image data retouching unit obtains a retouching value for the luminance value of said image data, and adds the retouching value to the tone values of element colors to retouch the image data.

11. (Amended) An image data retouching apparatus, as claimed in Claim 10, wherein:
